Christo van Staden, from Pretoria, South Africa has been facilitating Biodanza classes for ten years. He is also a Poet, and an initiate in the Andean Spiritual tradition. Biodanza is a powerful transformation process and technique for ecstasy. Through movement and music, we ignite our will to live, our enjoyment of life, our capacity to create the life we desire, the ability to create connections of love and care, and the ultimate experience of ourselves as fundamentally an expression of the totality of Life itself. christo@learningdesign.co.za
